

Excellerator™ Series

Powering Proven Technology

Propel's Excellerator™ Series

The Excellerator Series of drivers has been awarded the Pride Institute's "Best of Class" honor in 2014 and 2015 and has received acclaim in Dentistry Today's Top 50 Technology products in both years as well. Taking into account the feedback of thousands of Propel practitioners, Propel aims to continue to develop technologies that provide an array of options to best meet both practice and patient needs while ensuring top quality products.

6 Months
Canine Extrusion
Braces

7 Months
Space Closure
Clear Plastic Aligners

Excellerator RT

FEATURES

- 2 disposable tip options provide enhanced clinical accessibility
- Large handle with textured grip for increased stability and control
- Proprietary tip construction ensures consistent integrity
- Sterilizable handle

“The Excellerator RT has been enjoyed by clinicians of varying experience. When choosing one over the other, it simply comes down to doctors’ preference and comfort for which device will best fit into their office systems.”

Jonathan Nicozisis, DMD, MS

Excellerator PT

FEATURES

- Ergonomic design for comfortable use over multiple applications
- Optimal torque and speed making procedures fast and easy
- Surgical stainless steel ensures tip strength and integrity
- Patented thread design creates perforations with ease

“The power driver is fast, fluid, and with its push button delivery both in forward and reverse modes, is exceptionally easy to control.”

Gary Brigham, DDS, MSD
